

SHANZA KASHAF

MERN Stack Developer

Ghouri Town, Sharifabad Road, Islamabad | 0302-0504718 | shanzayjanjua7@gmail.com | github.com/zayy-06

SUMMARY

Entry-level MERN Stack Developer skilled in building full-stack web applications with React, Node.js, Express, and MongoDB. Built an AI-powered fitness platform and a full ecommerce store featuring secure REST APIs, JWT authentication, and Stripe payments. Eager to contribute clean, scalable code to real-world products.

SKILLS

Client Side: React.js, TanStack Query, Zustand, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML5, CSS3

Server Side: Node.js, Express.js, REST API Design, JWT Authentication, bcrypt, MongoDB, Mongoose, MySQL (basic)

DevOps & Tools: Git, GitHub, Postman, VS Code, Vercel, Render, Netlify

Other: Problem Solving, Teamwork, Time Management, Attention to Detail

PROJECTS

Posefit: AI-Powered Fitness & Posture Correction Web App *MERN Stack / Final Year Project*

Built a responsive React.js frontend with component-level state and hooks, giving users real-time feedback on exercise form. Developed a secure Node.js and Express.js backend with RESTful APIs for user data, workouts, and progress tracking. Trained a machine learning model to generate personalized diet plan recommendations based on user profile data. Built a Python service using OpenCV and MediaPipe for real-time pose detection and posture analysis. Implemented JWT-based authentication and managed the full project lifecycle from design to deployment. Integrated Stripe payment processing and Stripe Connect for secure online payments, professional payouts, and automated commission-based payment transfers.

MERN Ecommerce Platform

Built a full ecommerce store with product catalog, cart, checkout, and order tracking for customers and admins. Added product variants (size and color) with per-SKU stock, reviews and ratings, and a coupon system with expiry and minimum-order rules. Built an admin dashboard showing total products, total orders, and recent orders, with pagination and sorting on the product list. Enforced role-based access on the server, protecting cart, checkout, and admin routes from unauthorized access.

Full Stack Learning Platform

Connecting a React 19 frontend to a NestJS backend, replacing static mock data with live API calls. Building the API layer with Axios interceptors and an authentication store with Zustand, including persisted login state. Implementing course catalog, course detail, and enrollment features using TanStack Query for data fetching and caching. Wiring login, signup, and profile forms with React Hook Form and Zod validation.

EDUCATION

BS Information Technology | 2022 - 2026

Government Vihar-un-Nisa Graduate College for Women (Affiliated with University of the Punjab) | CGPA: 3.20

Intermediate (ICS) | 2020 - 2022

Wings College

LANGUAGES

English (Fluent), Urdu (Native)

CERTIFICATES

JavaScript Full-Stack Developer (NAVTC / EXD, NASTP)

IBM JavaScript Full Stack Development (Coursera)
